Experience

Lynky | 2021 - Present
Founder/Full-Stack Developer

Designed and developed core SaaS features, web client for data management, visualization, and user metrics in React, as well as implemented back-end and API functions in Node.js.

Dev & Gear | 2020 - Present
Front-End Developer

Created a custom content management system in React and Firebase/Google Cloud for managing the website content, and also developed the website in Next.js.

ForceManager | 2018 - 2019
Front-End Developer

ForceManager is a European leading mobile CRM solution where I helped with building and maintaining internal tools for users and system management.

Self | 2016 - 2018
Lead Front-End Developer

Self CRM (exit) was a startup leader in Italy (H-Farm, Treviso) where I provided leadership in building, maintaining, and implementing new features for the web client.

Next Italia | 2012 - 2015
Front-End/Hybrid Mobile Apps Developer

Worked on building iOS/Android hybrid mobile applications based on Ionic and Angular frameworks for clients mainly in the tourism and publishing sector.

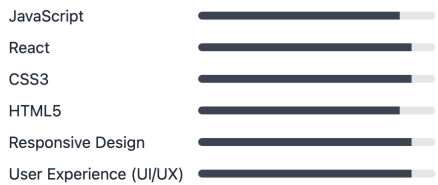

Education

- Cisco Networking** | 2010 - 2011
Certificate on Network Fundamentals
- ITIS Vito Volterra** | 2008 - 2011
Information Technology and Programming
- Technical School Pirot** | 2005 - 2008
Electrical Engineering and System Automation

Skills

Software Development

I'm fluent in JavaScript and React, semantic HTML, and responsive CSS. I've also written a good amount of Node.js, and I have experience with MySQL and NoSQL databases. During my career I've used various JS and CSS frameworks such as jQuery, Angular, Ionic, Bootstrap, Ember, etc.

Technical Leadership

- Work with engineers and designers to design and architect complex systems. Work with product managers to plan and prioritize features.
- Mentor developers, review code, and help establish best practices.
- Communicate and document effectively, and relate well to people.
- Provide web development expertise from many years of experience with the web technologies.

Languages

Side Projects

Jesolo Meteo

Designed and developed a near real-time weather app in Ionic, Angular, and D3.js for iOS/Android platforms based on a dedicated weather station for the city of Jesolo.

Jesolo Strade

Designed and developed a traffic and parking tracking app in Ionic, Angular, and Google Maps for iOS/Android platforms providing near real-time data updates from various sources with maps and live webcams.

About me

At the age of 14, I got access to the internet and that triggered my curiosity to learn how it works which lead me to self-learn HTML, and CSS, and start developing websites. I love things small, fast, and light – and that's paid off during my career.

Other than that, I love sports and I have a decade of experience in advanced calisthenics skills. I also enjoy reading, writing, and taking long walks with my girlfriend.
